

Bus Stop Design, Location and Road Safety

Course Overview

This one-day course examines road safety issues that need to be considered in the design and location of bus stops. This module is aimed at road safety and traffic management professionals seeking to learn or improve their skills in the assessment of the provision and location of bus stops. The course consists of informal short lectures, practical workshops and discussion sessions and case studies.

Aims and Objectives

The aim of the course is to examine road safety aspects of the design and location of bus stops and how to resolve conflicts. The course gives delegates confidence in dealing with requests for new or re-positioned bus stops.

Topics Covered

The one-day course focuses on the following key areas:

- Issues in the provision of bus stops
- Passenger issues
- Highways considerations
- Locating bus stops including workshop
- Accessibility of bus stops
- Accident risk workshop
- Bus stop location and design checklist

In-House Training

Please note this is only available as an in-house training course, delivered at your offices or at a suitable venue.

In-house training can often work out more cost effective where you have several members of staff you would like to be trained at any one time. The maximum number of delegates we can train on this course is limited to 16.

If you would like a quotation or further information regarding our in-house training, please contact us using one of the enquiry forms on our website.
