

# Collision Investigation

## Course Overview

GG 119 requires Road Safety Auditors to undertake a minimum of two days road safety audit, collision investigation or road safety engineering CPD each year. This Collision Investigation workshop will provide two days CPD to satisfy this requirement.

The course will also provide two of the ten days formal collision investigation training detailed in GG 119 to start a career as a Road Safety Auditor.

## Aims and Objectives

The main objective of this two-day workshop is to provide some practical experience in undertaking collision investigation work, including analysis of data and recommendations for improvements.

## Topics Covered

This two-day workshop focuses on the following key areas:

- Factors Involved in Collisions
- Reporting and Recording of Collision data including STATS 19 data
- Collision Problems and Trends
- Principles of Road Safety Engineering
- Calculating Collision savings and Economic analysis
- Road Safety Measures
- Road Safety Audit
- Examples of Road Safety problems
- Future of Road Safety

## Course Fees

For information on pricing please refer to the relevant website page.

## Booking

To make a booking on the course please choose from the following options (via our website):

- Online booking
- Offline booking form (only available on request)

## In-House Training

This course can be delivered in-house at your offices or at a suitable venue. In-house training can often work out more cost effective if you have several members of staff you would like to be trained at any one time. If you would like a quotation or further information regarding our in-house training, please contact us using one of the enquiry forms on our website.
