

Introduction to Highway Maintenance

Course Overview

A one-day course providing an introduction to highway maintenance issues for staff seeking to understand the principles of this area of work.

Aims and Objectives

The aim of the course is to help professionals understand the techniques and procedures for maintaining roads.

The course will clarify some of the legal issues and help to reduce potential liabilities.

Topics Covered

- Legal issues - powers and duties
- Maintenance standards and Codes of Practice
- Inspection and assessment procedures
- Surfacing materials
- Common road surface problems (Structural, Skidding resistance, Pot holes)

In-House Training

Please note this is only available as an in-house training course, delivered at your offices or at a suitable venue.

In-house training can often work out more cost effective where you have several members of staff you would like to be trained at any one time. The maximum number of delegates we can train on this course is limited to 16.

If you would like a quotation or further information regarding our in-house training, please contact us using one of the enquiry forms on our website.
