Introduction to Highway Design

Course Overview

A one-day course providing an introduction to highway design issues for staff seeking to understand the principles of this area of work.

Aims and Objectives

The aim of the course is to help professionals understand the design concepts and procedures for new roads and road improvements referring to both Manual for Street and DMRB principles.

Topics Covered

- Legal issues - powers and duties
- Design standards – MfS2 and DMRB
- Design Speed
- Horizontal and vertical alignment
- Visibility issues
- Capacity Issues

In-House Training

Please note this is only available as an in-house training course, delivered at your offices or at a suitable venue.

In-house training can often work out more cost effective where you have several members of staff you would like to be trained at any one time. The maximum number of delegates we can train on this course is limited to 16.

If you would like a quotation or further information regarding our in-house training, please contact us using one of the enquiry forms on our website.
