

Walking Route to School Assessments

Course Overview

A 2-day course providing an introduction to road safety risk assessment techniques and their application to Walking Routes to School, School Crossing Patrols, & Child Pedestrian Training sites.

Aims and Objectives

The course will provide an overview of the process of risk assessment, and demonstrate the applicability of risk assessment techniques to road safety activities and to WRTS, SCP, & CPT sites in particular.

We will also review current national guidance and compare this with the local policies that are currently in place.

Topics Covered

- Understanding collisions
- Hazard identification
- The process of risk assessment and risk assessments in road safety
- RSGB Walked Routes to School Guidelines and comparison
- Classroom WRTS workshop
- RSGB SCP Site Assessment Guidelines and comparison
- National CPT Site Assessment Guidelines and comparison
- Site visit(s) to WRTS/SCP/CPT location(s)
- Examples of issues to consider

In-House Training

Please note this is only available as an in-house training course, as it needs to be tailored to your existing policies and procedures. We will also include a site visit of a local route/routes where possible, which will need to be discussed and arranged in advance with our course instructor.

In-house training can often work out more cost effective where you have several members of staff you would like to be trained at any one time. The maximum number of delegates we can train on this course is limited to 16.

If you would like a quotation or further information regarding our in-house training, please contact us using one of the enquiry forms on our website.
